

Permai Polyclinics Inanam

Located at the Inanam Business Centre, in Sabah, Permai Polyclinics Inanam is another symbol of the Permai Group's expansion growth while aiming to serve and provide the best possible healthcare services in Sabah. This is a reflection of their status as one of the premier and biggest polyclinics group in Sabah.

Permai Polyclinics Inanam was founded by Dr. Francis Ambrose in May 2007. Having achieved his qualifications at the University of Kerala in India, Dr. Francis served at the Queen Elizabeth Hospital, Sabah for a year – from 2001 until 2002 - before transferring to Keningau and Penampang respectively. It was only in 2007, that Dr. Francis felt the need to change course by joining and heading the Permai Polyclinic branch in Inanam.

With hard work and dedication, Dr. Francis Ambrose and his team of six staff endeavoured to make certain that Permai Inanam would be able to stand on par with the other clinics in the region in providing the best medical attention that they could offer.

From the initial six member staff, the group now boasts an 11-member strong team alongside the doctor himself. The key to their success, according to the learned doctor, is simply hard work in providing quality healthcare that is consistent with the Permai brand's motto of "We Live to Serve." As well as the steady growth in the number of Permai Polyclinics, additional services were provided including amongst others, PAP smear screening, antenatal medical examinations, vaccination for children and adults, minor surgeries, house calls and the *TAK NAK* quit smoking programmes. The latest offering, courtesy of MIDF's financial assistance, is their X-ray services.

MIDF's financial infusion into Permai Polyclinics has seen the latter investing in a CXR machine, hence enabling them to conduct X-ray services. This has also helped them to make significant inroads into the local business industries, which as per Dr. Francis Ambrose's words, "the purchase of the CXR machine has enabled us to do x-rays for Growarisan."

Armed with these latest developments, the Permai Polyclinics team is determined to consolidate their hard work and to move forward in the future. Ultimately, it is their very dedication that has led to these successes and fostered a loyal bond between Permai Polyclinics and its steady stream of local patrons, whom are comforted in the knowledge of receiving quality medical assistance.
