Initial Service Charge	Up to 5.00% of NAV
Redemption Payment Period	Within 10 calendar days
Investment Manager	MIDF Amanah Asset Management Bhd

MANAGER'S COMMENTS

Review

January was an exciting month for Malaysian markets as the benchmark FBMKLCI ended the month 30 points or 1.8% higher at 1,671 points. Markets started off 2017 sturdily, surging 33 points or 2% on 6th January to 1,675 before consolidating on profit taking as a result of a selloff that saw the benchmark index slid to 1,659 points in mid-January. Markets however rebounded and hit the month's high of 1,692 points supported by foreign funds that turned net buyers on 26th January. The broader market outperformed the FBMKLCI with the FBM Emas surging 2.4% MoM to close at 11,499 points while Small caps also outperformed the benchmark index with the FBM small cap index gaining 4.8% MoM to 15,075 points. The average daily value traded on Bursa for the month of January increased 10% MoM to RM1.92bn as investors come back strongly just before the holiday shortened month with intentions of getting some goodies ahead of the Chinese New Year celebrations.

Investment Outlook & Strategy

Our overall equity asset allocation remains at an Over-Weight level (93% average) but we will tactically remain in trading mode. Our immediate tactical strategy is to continue investing selectively in sold-down index-linked stocks first before turning towards our preferred list of small-mid cap companies with high dividend yields, growth, under-valued, recovery, and thematic plays (E-Commerce, General Election, Green Energy, Penang-Sabah-Sarawak infrastructure, Tourism, strong USD beneficiaries, etc.) that will hopefully position the portfolio well into the 2H of 2017.

As such, our bigger picture focus of long term outperformance at the expense of short term gains remains unchanged as trying to time purchases and sales in a volatile market more often than not is detrimental and costly. As a result of this, the general reinvestment, rebalancing and/or switching activities will continue to focus on stocks with robust fundamentals and clear earnings visibility. We also allocate a portion of our portfolio to high dividend yielding stocks to ensure consistent income stream.

(1) Based on the fund's portfolio returns as at 15 January 2017, the volatility Factor (VF) for this fund is 9.67 and is classified as "high" (source:Lipper).

(2) Volatility Factor (VF) is subjected to monthly changes and Volatility Class (VC) will be revised every six months.

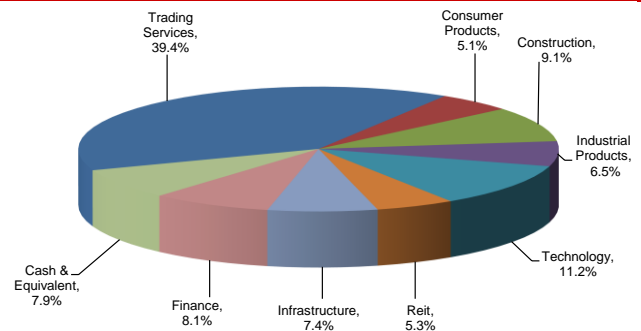

(3) The portfolio composition may change overtime, therefore there is no guarantee that the VF and VC to remain constant.

Investors are advised to read and understand the prospectus before investing. Among others, investors should consider the fees and charges. The price units and distributions payable, if any, may go down as well as up. Past performance of the fund should not be taken as indicative of its future performance. Investment in the funds are subjected to market risk, stock specific risk and liquidity risk. A copy of our Master Prospectus dated 1 March 2016 has been registered with the Securities Commission who takes no responsibility of its contents. The prospectus and application form can be obtained at our office. Units will only be issued upon receipt of an application form referred to in and accompanying the prospectus.
