Investment Manager	MIDF Amanah Asset Management Bhd

#### MANAGER'S COMMENTS

##### Review

Malaysian Government Securities ("MGS") weakened driven by the sell-off in US Treasuries and Eurozone government bonds. Players were slightly cautious as the ringgit weakened on speculation that Fitch Ratings will downgrade Malaysia as the US moves towards raising interest rates. The overall local government bond and sukuk yields suffered significant losses with the exceptional the 3-years MGS benchmark declined 13bps lower at 3.17%, the lowest level since Jan 2014. The ample liquidity on the back of slow bill auctions is supporting sentiment on the short end of the yield curve. BNM conducted 2 reopening tender of the 10-year and 7-years MGS benchmark. Demand was weak at 1.67 times and 1.9 times respectively.

As at closed, the MGS 5-, 7-, 10- and 15-years closed higher by 5 to 15 bps at 3.64% (May 2015: 3.57%), 3.96% (3.81%), 4.01% (3.91%) and 4.17% (4.13%) whilst the 3-year closed 13bps lower at 3.17% (3.30%).

##### Investment Outlook & Strategy

Despite lingering concerns over oil prices, the current macro environment; 1) accommodative OPR outlook, 2) subdued global growth and 3) benign inflation appears supportive for bond dynamics. However, we expect a sideways range bound movement in the local bond market due to lack of pertinent macro data and market direction may be negatively influenced if Fed hike interest rate sooner than expected.

We foresee the local bond market players will remain cautious on the back of global bond market volatility. Long dated bonds will continue to be under pressure whilst the short dated will remain supported on the back of ample liquidity likely driven by the net inflows from the discount instruments out of matured BNM noted. Having said, the total debt securities reported a m-o-m outflow of RM7.9 billion. MGS foreign holdings stood steady at 46.9% in May (Apr: 47.0%, Mar: 45.7%), with a small m-o-m inflow of RM0.6 billion in foreign holdings.

On the monetary policy front, BNM held steady its Overnight Policy Rate steady at 3.25%, citing the stance of monetary policy remains accommodative and supportive for growth. Malaysia's growth is expected to remain on steady path aided by domestic demand, whilst inflation will be contained even with the GST, as commodity prices remain low. Hence, we opined the OPR will stay at 3.25% for the rest of 2015.

In view of the above, we remain cautious but continue to take an overweight stance on selected corporate bonds (especially from the primary market) vis-à-vis a more volatile government bond market, while tactically managing duration and pro-actively realigning the asset allocation in line with market movements.

#### LARGEST HOLDINGS (as at June 30, 2015)

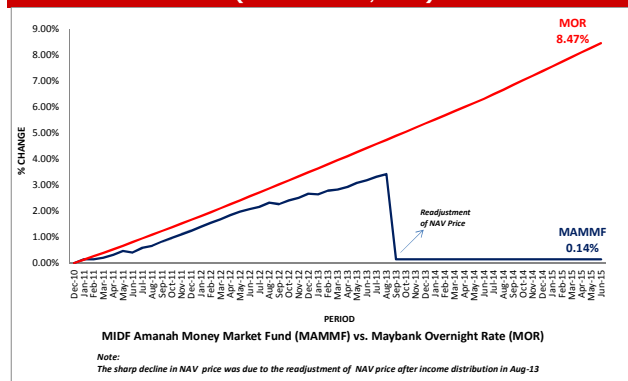

MONEY MARKET PLACEMENT	99.48%
CASH	0.52%
