Financial Year End	15 <sup>th</sup> day of November
Management Fee	0.5% p.a. of NAV
Trustee Fee	Up to 0.05% p.a. of NAV
Initial Service Charge	Nil
Redemption Payment Period	Within 10 calendar days
Investment Manager	MIDF Amanah Asset Management Bhd

#### MANAGER'S COMMENTS

##### Review

Ringgit government bonds dealt firmer underpinned by improving sentiment and foreign inflows whilst foreign reserves improved by USD 1.2billion to USD 97.3 billion as at 15 May 2017. Gains were also driven by the stronger MYR, subdued external risks despite an increasingly hawkish US Fed and dip in oil prices below the \$50/bbl.

The overall MGS yield curve trended lower across the tenor but interest mainly slanted towards short to medium tenor benchmarks. Meanwhile, the 10-years MGS benchmark dipped circa 18bps, last traded below 4.00% since November 2016 whilst the MYR strengthened by 1.38% m-o-m. Meantime, foreign participants were seen initially buying the short end of the curve before extending into the belly and the longer end of the curve.

As widely, expected, BNM held the OPR steady at 3.00% in May 2017. Though projecting an overall neutral tone in the statement accompanying the rate decision, policymakers indeed sounded more upbeat on growth on the global and domestic economic but cautions that risks remain. Growth continued remains driven by both domestic and external demand and expected to strengthen in the 1Q2017 and to be sustained for the rest of the year.

On a monthly basis, the 5-, 7-, 10-, 15-years fell 10 to 18bps closed at 3.56%, 3.81%, 3.87% and 4.31% respectively whilst the 2-years closed higher by 8bps at 3.29%. Similarly, the GII-segment also traded lower 2 to 12 bps with 3-, 5-, 7-, 10- and 15-years closed at 3.63%, 3.72%, 3.92%, 4.00% and 4.52% respectively.

#### Investment Outlook & Strategy

Bank Negara Malaysia expects the Malaysian economy to expand by 4.3% - 4.8% (2016 forecast: 4.0% - 5.0%) in 2017 in conjunction with its Annual Report 2016 release. Growth will be supported by sustained domestic demand and improvement in exports. The central bank also sees that inflation to moderate in the 2H2017. Latest April CPI moderated to 4.4% y-o-y suggesting inflation may have peaked in March at 5.1% y-o-y. Hence, we foresee that there is no urgency for BNM to hike rates to tame inflationary pressure and expect for the OPR to stay unchanged for the rest of 2017.

Meanwhile, foreign holdings continue to mirror positive momentum with a 2<sup>nd</sup> month of net positive bond inflow. Foreign holdings in MGS gained +RM8billion to RM150.50 billion or 41.8% versus 39.7% in April 2017, as foreigners turned net buyers in May after the large outflow from MGS since November 2016. We think demand for government bonds is still healthy whilst appetite remains along the short belly of the curve.

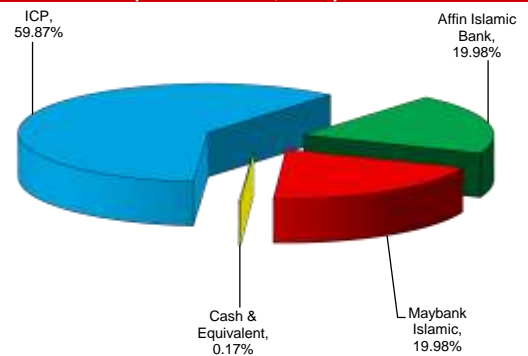

At this juncture, the highlight should be on the upcoming FOMC in June, as the Fed will reveal its economic projections alongside the rate decision. Assuming Fed policymakers maintain their previous projection (target median Fed funds rate at 1.40% by end-2017), ringgit bonds should see some profit taking activities especially after the recent rally. However, the downside maybe limited unless MYR continues to strengthen substantially.

The Fund will continue investing in short term Islamic deposits.
