Initial Service Charge	Nil
Redemption Payment Period	Within 10 calendar days
Investment Manager	MIDF Amanah Asset Management Bhd

MANAGER'S COMMENTS

Review

For the month of May, the local government sukuk/bonds yields dropped following the BNM's OPR cut by 50bps from 2.50% to 2.00%. MGS curve shifted about 3-13bps lower after the OPR cut, with the 3-year moving the most. The 5-year MGS declined 3bps at 2.48% while the 10-year MGS declined by 10bps to 2.79%. Although the 50bps rate cut was already mostly priced in, we think there is still room for the yields to fall further.

On overall, trading activities for local government sukuk/bonds in May was lower driven by the reduced trading days to make way for few public holidays including Hari Raya celebration. Heavy volumes trades were dominated by the 10y MGS benchmark. We view that trading activities to pick up in June especially in the longer tenure space as investors' appetite now is towards the high yielding space.

On month-on-month basis, MGS 3-, 5-, 7-, 10- and 20-year except 15-years closed 3bps to 13bps lower at 2.40%, 2.51%, 2.67%, 2.89%, 3.09% and 3.38%, whilst 15-years closed 8bps higher to 3.17%. Meanwhile, GII traded mixed with 3-, 5- and 10-years closed lower at 2.32%, 2.49% and 2.75%, whilst 7-, 15- and 20-years closed higher at 2.71%, 3.25% and 3.45%, respectively.

Investment Outlook & Strategy

The current macro backdrop continues to provide positive vibes for fixed income investments. Ample domestic liquidity as well as measures provided by BNM are expected to anchor demand for local government sukuk/bonds further.

We view demand for local government sukuk/bonds to remain positive from the recent measures by BNM on MGS/GII to be included for Statutory Reserve Requirement (SRR) compliance which be extended to banking institutions, previously allowed for Principal Dealers.

Given the current landscape, we opine sentiments to remain fragile as investors are staying cautious as global and domestic backdrop remain uncertain. However, further flattening of COVID-19 curve is expected to infuse better market optimism and hence improved demand for sukuk/bonds market. We expect the local government sukuk/bond curve to flatten as investors may continue to extend duration for better yield pick-up.

The Fund will continue investing in short term Islamic deposits.

LARGEST BANKS (as at 31 May 2020)

BANK MUAMALAT MALAYSIA BERHAD	15.92%
