#### MANAGER'S COMMENTS

##### Review

October was a recovery month for Malaysia as the KLCI rebounded and managed to stay above the 1,700pts psychological support level for a while before profit taking activities dragged the benchmark index lower during the last week of the month. The rebound was quicker than expected and came on the back of returned stability to global markets and Wall Street's strength. The FBMKLCI rose 45pts or 2.8% to end the month at 1,666pts. The broader market outperformed the KLCI, with the FBM Emas gaining 3.3% M-o-M to 11,574pts while Small caps did even better as the FBM Small cap index rallied 7.7% to 15,684pts as the FBM ACE jumped 12.9% M-o-M to 6,214pts. Average daily value traded for the month of October rose 5% M-o-M to RM2.24bn.

##### Investment Outlook & Strategy

As expected, the improving market sentiment has led to a more stable market conditions on the back of strengthening Ringgit against USD, improving CPO and Crude Oil prices, accommodative monetary policy, and expectation of a favourable Budget 2016 to boost the economy.

Market is expected to trend up gradually but we, on the contrary, are taking a tactical move to "Sell on Market Strength". As such, we are now reducing our asset allocation towards Neutral by year-end to take advantage of current market run-up and/or possible market correction. Focus on leading indicators of market liquidity fund flows over pure economic fundamentals (lagging catalyst) will continue to be very crucial at current times of uncertainties.

We continue to believe strongly that markets move in cycles and historically periods of downturn were always shorter than upturns. The market's fundamentals still offer opportunities at the right price as equity will still be a relatively better asset class to invest in compared to fixed income on the back of flush liquidity and eventual rising interest rates environment moving forward.

Therefore, long term investment strategy should reflect such conditions rather than allow our short-term sentiments and emotions over-ruled the logical thought process. As a result of this, reinvestment, rebalancing and/or switching activities will focus towards; (a) specific small to mid-cap for growth outperformance while timely selective big-cap index-linked stocks for indexation & dividend yield play, (b) under-valued companies with cheap valuations against its historical band/peers, (c) fundamentally strong companies which are currently at

(1) Based on the fund's portfolio returns as at 15 October 2015, the volatility Factor (VF) for this fund is 19.26 and is classified as "very high" (source:Lipper).

(2) Volatility Factor (VF) is subjected to monthly changes and Volatility Class (VC) will be revised every six months.

(3) The portfolio composition may change overtime, therefore there is no guarantee that the VF and VC to remain constant.

Investors are advised to read and understand the prospectus before investing. Among others, investors should consider the fees and charges. The price units and distributions payable, if any, may go down as well as up. Past performance of the fund should not be taken as indicative of its future performance. Investment in the funds are subjected to market risk, stock specific risk and liquidity risk. A copy of our Master Prospectus dated 1 March 2015 has been registered with the Securities Commission who takes no responsibility of its contents. The prospectus and application form can be obtained at our office. Units will only be issued upon receipt of an application form referred to in and accompanying the prospectus.

the wrong market cycle but will benefit moving forward due to its inflection point of structural or induced recovery, and (d) tactical position in specific thematic plays, other than selective defensive-resilient led stocks.
