## Affin Bank Berhad

(5185 | ABANK MK) Financial Services | Finance

Credit Costs and NIM Issues to Persist

#### **KEY INVESTMENT HIGHLIGHTS**

- Core themes: (a) NCC warning in 3QFY23 (no overlay writebacks expected), (b) NIM compression likely, (c) Putting the brakes on residential mortgage uptake
- Forecasts revised: FY23F Core NP adjusted by -10%
- Maintain NEUTRAL with Unchanged TP of RM1.82 based on an unchanged FY24F P/BV of 0.34x

## Verdict: Decent drivers but with a lot of potential for risk.

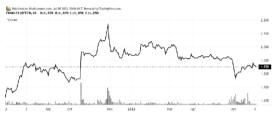

- 1. Very high loan growth. Yays
  - 2. Progress in filling up an AHAM-shaped hole wit and wealth management capabilities.
- 1. With no overlay writeback expected, NCC outle Nays especially for 30FY23.
  - 2. Further NIM compression expected.
  - 3. OPEX still yet to be controlled.
- 1. App delayed again, delaying CASA build. OKs Potential partnership with Sarawak state government - but 2 still in very early stages.

#### Highlights from our recently held briefing with Affin:

Net credit costs - no overlay release expected. We understand that all the build-up in overlays will be converted into company-specific provisions. Meanwhile, the management is expecting 3QFY23 to be another heavy quarter for provisions but the provisions in 2QFY23 is still manageable. Regarding its exposure in a pharmaceutical company, management remained tight-lipped, but it was emphasized that it will be fully provided.

NIMs may see further compression in 2QFY23. This is as deposit competition is still very tight in the Islamic space, though it has improved on Conventional side. Interestingly, management believes that this deposit competition is mainly concentrated among certain banks.

Loan growth target still in reach. Management is confident in achieving +12%yoy FY23 target. Reiterates it is pumping breaks to slow down on current rate of growth - especially on the lower yielding residential mortgage segment. Drivers are retail and SME loans. Management will be more selective in growing its corporate portfolio. As part of NIM optimisation strategy, the Group remains committed on building its credit card and personal financing loans. The management does mention that hire purchase applications are slowing down for now. Following its exorbitant loan growth, Affin finds loan competition coming in from larger banks now, as opposed to smaller banks previously.

**RETURN STATISTICS** 

Price @ 5 July 2023 (RM)

Expected share price return (%)

Expected dividend yield (%)

**OPEX target is maintained.** Management is maintaining its <10%yoy OPEX target. The major drivers for OPEX growth are personnel and tech spend, with cost inflation and Collective Agreement issues coming up.

**No change in dividends expectation.** Management indicated that the dividend payout still retained at 40-60%. Meanwhile, for the latest DRP, we understand that it had 71% take up rate.

**Sarawak story – still no concrete plans.** It was hinted at Sarawak state wanting a larger stake than the current 4.95%. Growth in Sarawak is apparently exceeding expectations: Management wants to double up on this growth, will up itsbranch network.

**Tech and mobile app delayed again.** App, scheduled for release in Jun-23, has been delayed again due to a bug issue – this time to July/August. This puts a dent to its CASA target of 25% by year-end (currently 22%). The app is for retail users – but management believes that this will have a positive knock-on effect on its corporate app. For app promotion, management will be piggybacking on pre-existing media plans, to manage marketing cost. In addition, management will be leveraging on big data tech (estimated rollout: Dec-23) to improve customer personalisation. This improves cross-selling, build fee income franchise and customer loyalty.

**Bond issuance.** Interestingly, Affin's recent RM500m AT-1 issuance (5.7%) was 100% subscribed to by retail investors – 1.3x oversubscribed.

Forecasts revised: FY23F Core NP adjusted by -10%. To reflect higher NCC and lack of overlay writebacks in the year. *Key downside risks.* (1) OPEX unable to be controlled, (2) Lacklustre NOII recovery, (3) NCC higher than expected.

**Maintain NEUTRAL call: Unchanged GGM-TP of RM 1.82**. While Affin seems to be headed to a better direction, it still needs work on cost control. In the near term, heavy provisioning should dampen near-term prospects. The TP is based on an unchanged FY24F P/BV of 0.34x. (*GGM assumptions: FY24F ROE of 5.3%, LTG of 4.5% & COE of 6.7%*)
