Low Contribution from Wilmar

KEY INVESTMENT HIGHLIGHTS

- Below expectations
- Core business is improved better than expected
- Wilmar performance remains challenging
- Earnings forecast; tweak lower
- Maintain NEUTRAL with a revised TP of RM13.86

Earnings deteriorated further. 9M23's core PATMI came-in below our consensus forecast at 66% and 53%, amounted RM873.4m (-46.0%yoy), whilst revenue remained flat at RM4.46b (-1.8%yoy) supported by its two-core business which are grains and agribusiness and film exhibition and distribution. Surprisingly, operating profit were much higher at RM361.4m (>100%yoy) with improved operating margin of +8.1% (+6.7 pts) on better film exhibition contribution.

Grains and agribusiness. The segment profit increased significantly to RM154.9m (>100%qoq, >100%qoq) during the quarter, owing to an RM31.3m one-time gain from the disposal of PT Pundi Kencana, as well as improved demand activities from Indonesia and China flour, particularly with low raw material costs in hand. Profits for 9M23 increased to RM223.1m, and margin improved to +6.7% (>100 points), owing to improved performance of Malaysian operations with greater sales and profit margins.

Film exhibition and distribution. In summary, the film segment managed to returned profit of RM19.4m (>100%ytd) in tandem with surged in revenue of RM463.3m (+21.2%ytdy) it recorded. This was mainly due to a 23% and 25% increase in Malaysia box office collections and admissions for Malaysian operations coupled with improved contribution from the Vietnam operations.

Earnings estimates. We pare FY23 earnings by -8.6%yoy to reflect weaker Wilmar contribution profit contribution. Nonetheless, we noticed the consolidation in wheat prices continued, where the commodity has dropped to the average of USD325.3/Mt (-11%qoq) in 3QCY23 from average price of USD363.8/Mt sequentially. This will result in grains and agribusiness crushing margins to normalize, aided by prudent procurement of feedstock as well a decline in in the price of wheat, hence we project this segment would continue to lift the group's operating profit to RM120-160m level over next the 3 years.

Maintain NEUTRAL. We foresee its crushing margin to normalise ahead following consolidation of wheat's average year-to-date price of USD351.1/Mt (-19%yoy), however the optimism in the core business was tapered by Wilmar performance (easing in all 3-core business). Hence, we are maintaining our **NEUTRAL** call with a revised **TP of RM13.86** (previously RM15.17) based on PER of 16x by pegging FY23F EPS of 86.6sen.
