

Monthly Stats Update | Tuesday, 02 January 2024

Maintain POSITIVE

Nov-23 Banking Stats: Loan growth rises again

KEY INVESTMENT HIGHLIGHTS

- (1) Good recovery in loan growth, (2) GILs continue to be controlled well, with no notable deteriorations.
- (1) Leading indicators were more normalised, following an excellent couple of months, (2) FD rates were flattish, (3) Deposit growth was slow, with stronger non-retail balances offsetting heavy government withdrawals.
- Maintain POSITIVE call: Valuations and dividend outlook are strong. We feel that upside rerating drivers should provide a boost to sector valuations, especially since the worst seems over for now.

Headed Where?

BANKING

With most major headwinds are in the past – we currently looking to multiple upside possibilities.

Strategy

Following indication that asset quality and NIM concerns were exaggerated, we think the sector remains attractive for its valuations. We do urge investors to be more selective with their picks, as not all banks have optimal outlooks.

Core Themes

- ▲ Further asset quality and NCC improvement expected

 with high writeback possibility.
- 2. ▲ Post-CNY FD rate testing by banks there is a possibility for further normalisation in rates, and subsequently upside to NIMs.
- 3. A Industry dividend outlook is still excellent.
- 4. Some concerns on loan growth outlook, especially if retail loan take-up weakens.

Side Themes

- More relaxed CY24 OPEX growth, after an eventful CY23.
- 2. Regular deposit competition in 4QCY23, though banks are even more prepared from a liquidity standpoint than regular years (fearing a repeat of last year).
- 3. ▼ Long-term concern: Thinning residential mortgage margins should see banks escalate take-up of riskier unsecured or non-retail loans.

▲ Loan growth +4.9%yoy / +0.8%mom

A strong uplift from a sluggish couple of months.

- Retail loans: +7.7%yoy / +0.7%mom
 Remained consistent and strong: Observe strong month-on-month growth in both hire purchase loans and residential mortgages.
- Business loans: +1.7%yoy, /+0.9%mom

 After a weak Oct-23, working capital loans saw a good recovery.

► Leading indicators

Following a strong couple of months, monthly applications & approval show sharp mom decline (back to more normalised figures). Business leading indicators were more affected than retail side.

Approval rate: 51%.

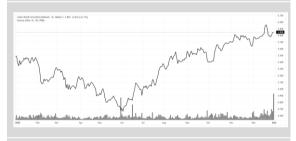

COMPANY IN FOCUS

CTMB

Maintain **BUY** | Unchanged Target price: RM6.62 Price @ 29 December 2023: RM5.85

- Niaga's lucrative Indonesian market exposure.
- Digital offerings coming online, offering less drag to ROE.
- Still room for improvement in ROE restructuring watch for further cost optimisation.

Share price chart

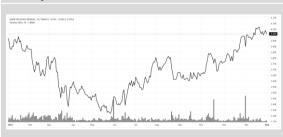

AMMB

Maintain **BUY |** Unchanged Target price: RM4.23 Price @ 29 December 2023: RM4.01

- Dividend payouts are likely to be revised upwards, on the back of stronger CET1 (which will come).
- Capital optimisation exercises to persist.
- Added possibilities with tax return expect boosted LLC at very least.

Share price chart

Analyst Samuel Woo samuel.woo@midf.com.my

Deposits +3.5%yoy / +0.3%mom

A slow month for deposits.

▼ FD growth: +5.6%yoy / 0.0%mom

Declines were largely driven by government withdrawals.

• **CASA growth:** +1.2%yoy / +0.8%mom

CASA balances continue to be maintained well – driven by non-retail balances.

LCR: 150%.

Flattish - decline was very minor.

• Loan/Deposit ratio: 90.5%.

This figure went up slightly, due to strong loan growth reported.

▲ GIL ratio 1.69% / -2bps mom

Asset quality continued to be maintained well.

- A Notable deteriorations, month-on-month: None.
- **Notable improvements, month-on-month:** Construction -22bps, Working capital -3bps.

Interest rates

Interest rates remained relatively flattish on a sequential month basis.

- **FD rates (Conv.):** Uniformly flattish.
- **FD rates (Isl.):** Some brackets (most notably, 3M and 6M) saw slight increase.

Have a look at:

- **1.** A huge leap in working capital loans. Loan growth recovery was driven by a steep uptick in working capital loans (as post-election disbursements start flowing through).
- 2. ▼ SME applications have already experienced a decline in Oct-23. Oct-23 saw the highest ever volume of system applications and approvals it is interesting to see that SMEs bucked the trend and contributed only marginally to the higher system figure.
- 3. ▼ There has been a sharp mom decline in government deposits... The decline in government deposits was largely reflected in contracting FD balances.
- **4.** ... while business enterprises see good mom increase. This was reflected in a sharp uptick in demand deposits (which surpasses the monthly decline in FDs).

Maintain POSITIVE call. (Our comprehensive list of sector drivers is on the first page).

Top downside risks include:

- 1. Loan growth slowdown as economic conditions fail to improve.
- 2. Persistent deposit competition.
- 3. Lacklustre fee income pickup.

Top Picks: CIMB (BUY, TP: RM6.62) and AMMB (BUY, TP: RM4.23).
