CVS Hits Billion-Revenue; Momentum Still Building

KEY INVESTMENT HIGHLIGHTS

- Within Expectations
- Positive 12MFY24 performances across all segments with the CVS segment achieving billion-ringgit revenue
- Repayment of borrowings to reduce finance costs
- Raised FY25-26F earnings forecast and introduced FY27F
- Upgrade to BUY (previously NEUTRAL) with a higher TP of RM7.25 (previously RM6.50)

Within Expectations. QL Resources reported FY24 core PATANCI of RM437.9m, in line with our projections (102.3%) and consensus' estimates (101.5%).

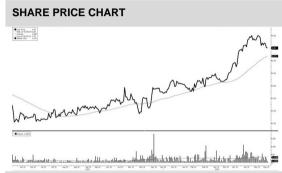

Lower dividend. The group proposed a final single-tier dividend of 3.5sen/share, subject to shareholder approval at the upcoming AGM. This brings the total dividend for FY24 to 6.5sen/share, down from 7sen/share in FY23.

Stronger revenue from ILF and CVS segments in 4QFY24. On a yearly basis, revenue rose +13.7%yoy to RM1.67b, driven by (1) robust fishmeal and surimi sales, (2) higher clean-energy project progress from BM Greentech, (3) increased raw material trading volume, greater egg production from Vietnam and Malaysia, and (4) stronger average sales per CVS store combined with additional 38 new FM stores and 32 FM Mini stores during the quarter. Core PATANCI surged +34.8%yoy to RM98.8m in 4QFY24, attributed to higher revenue together with better margins for fishmeal, surimi products, and clean energy projects.

Seasonally low quarter for MPM and CVS segments. On a quarterly basis, core PATANCI dropped -20.1%qoq to RM98.8m, in tandem with reduced revenue of RM1.68b (-2.1%qoq). This was largely due to (1) halted fishing activities due to the monsoon, (2) margin compression in fishmeal, surimi, and aquaculture activities, (3) lower CVS store sales during CNY celebrations and Ramadhan, and (4) margin erosion in feed raw material trading and weaker Vietnam farming operations.

Positive FY24 performances across all segments with the CVS segment achieving billion-ringgit revenue. Cumulatively, revenue grew +6.6%yoy to RM6.7b in FY24. This was mainly driven by higher average store sales and more stores under the CVS segment (+25.7%yoy), as well as greater clean energy projects under the POCE segment (+12.5%yoy). Meanwhile, the MPM and ILF segments recorded stable revenue growth of 2.6%yoy/2.3%yoy, respectively. Core PATANCI surged +26.3%yoy to a record high profit of RM437.9m, thanks to higher revenue along with the (1) strong turnaround in POCE margins, (2) better margins for fishing, fishmeal, and surimi-based products, and (3) contributions from a newly acquired layer farm in Malaysia, government subsidies for eggs in Malaysia, and recovery of Indonesia ILF operations.

Repayment of borrowings to reduce finance costs. Total borrowings dropped 13.7%yoy to RM1.06b in FY24, mainly due to the repayment of long-term borrowings. The net gearing ratio improved from 0.3x in FY23 to 0.2x in FY24.

Raised FY25-26F earnings forecast and introduced FY27F forecast. We revised our FY25-26F earnings forecast higher by +13.2%/ +16.1% respectively and introduced the FY27F projection. This reflects expectations of: (1) higher CVS store counts and average sales, (2) higher clean energy projects with high margins, (3) higher MPM revenue from a new plant at PT Hasil Laut, and (4) lower finance costs due to borrowings repayment and a favourable interest rate outlook.

Upgrade to BUY (previously NEUTRAL) with a higher TP of RM7.25 (previously RM6.50). Our **TP** is based on a 10-year multi-stage DCF model with an unchanged growth rate of 3.5% and a revised WACC of 7% (from 6.7%). We like QL Resources' diversified revenue base, which operates across 4 divisions and geographical regions and thus offers protection against potential downside risks. Moving forward, we are optimistic about the CVS segment's revenue growth momentum, driven by new outlet openings and better consumer sentiment (supported by an improving job market and progressive wage hikes). We also expect more clean energy projects from BM Greentech under the POCE segment, aligned with government renewable energy initiatives and global energy transitions. The MPM and ILF segments are expected to remain strong underpinned by sustained demand for poultry products and soaring demand for seafood products. Hence, we upgrade QL Resources to **BUY** from NEUTRAL.

Potential downside risks are (1) a sharp increase in operating costs, which could erode margins in the MPM, ILF, and CVS divisions, (2) lower-than-expected clean energy projects, and (3) weaker-than-expected consumer sentiment.
