Dear Unit Holders:

FUND CATEGORY AND TYPE

Fund Category	Islamic Money Market
Fund Type	Income (Islamic)

ASSET ALLOCATION AS AT 15 MAY 2024

Short Term Islamic Fixed Income Securities	0%
Islamic Money Market Instruments and Others	100%

PERFORMANCE OF THE FUND

MIDF Amanah Shariah Money Market Fund II ("MASMMF II")	15/05/2024	15/11/2023	%
Net Asset Value ("NAV") (RM)	89,329,871	387,015,565	-76.92
NAV per Unit (RM), Ex-distribution (RM)	0.5006	0.5007	-0.01

During the interim period, the NAV per unit maintained at RM0.5000. The difference of 0.01% in the NAV per unit is the distribution payable for the period from 1 May 2024 to 15 May 2024, which will be declared in the next financial period of the Fund. The number of units in circulation has decreased from 772.93 million units as at 15 November 2023 to 178.43 million units as at 15 May 2024. The Fund distributed RM0.82 sen net income per unit, which translated to a net dividend yield of 3.34% p.a. for the six months period ended 15 May 2024.

The Fund met its objective of providing capital stability and to provide regular income through monthly income distribution, if any. The Fund invested wholly in short-term Islamic money market deposits.

The Maybank Islamic Overnight Rate has been identified as the benchmark as it provides a good indicator on the performance of the Islamic money market.

FIXED INCOME / SUKUK MARKET REVIEW

USTs traded lower in 1Q, as the US economy continued to defy expectations for a weakening of economic conditions, underpinned by a labour market that has remained surprisingly resilient, amidst continued moderation in inflation. Benchmark yields rose by 26-40bps for the quarter (4Q23: 67-80bps higher) as the market dialled back significantly on rate cut expectations, with Fed Fund Futures only pointing to 2-3 Fed cuts for 2024 by the end of 1Q, versus 6-7 cuts priced for 2024 as at the end of the preceding quarter. The curve bear-flattened slightly for the quarter, as the front end of the maturity spectrum bore the brunt of the sell off, with 2s10s finishing 1Q at -42bps (4Q23: - 37bps). The Fed's Dot plot median projection during the March FOMC continued to point to 3 cuts in total for 2024. Expected the FOMC to begin reducing the Fed Funds Rate in 3Q and continue to foresee 3 cuts of 25bps in total for 2024, with risk for lesser cuts.

MGS and GII were mixed q/q as overall benchmark yields closed between -6 and +11bps (4Q23: 8-23bps lower) with the 10Y sector underperforming and the 30Y sector registering the best performance. Foreign holdings of overall MYR bonds fell by RM4.6b during the quarter, from RM270.4b as at end 4Q23 to RM265.8b as at end 1Q24. Government auctions in 1Q24 saw better bidding metrics despite higher gross issuance of RM45.0b and no redemptions, with an average BTC of 2.71x across 9 auctions (4Q23: 8 auctions; average BTC 2.24x; gross issuances RM41.0b). BNM left interest rates unchanged during their two policy meets on Jan 24 and Mar 07, and continued to strike a neutral tone in the monetary policy statements; we expect them to continue to stand pat on rates in 2Q and for the remainder of 2024. Inflation is expected to head higher, as continued subsidy rationalization takes place amidst low base effects. BNM is expected to be on the lookout for second round effects and could change their bias should any materialize. Local bonds could face a more challenging outlook going forward, after performing decently against the weak global bond backdrop in 1Q24.

INVESTMENT OUTLOOK AND STRATEGY

Despite the selloff in the UST market, the local MGS market did not suffer a similar spike in yields. Bonds yields only rose marginally and were relatively supported. This has been attributed to the deep domestic liquidity holdings, particularly from GLICs and institutional investors.

With the resilience seen in the domestic bond market, our strategy remains to be tactically overweight duration relative to the benchmark. We focus more on corporate bonds for yield pickup and will consider trading in government bonds if valuations are attractive.

Meanwhile, on the local front, Bank Negara Malaysia (“BNM”) maintained the Overnight Policy Rate (“OPR”) at 3.00% in its Monetary Policy Committee (“MPC”) meeting, in line with market consensus expectations. We expect BNM will be maintained the OPR at 3.00% for the year 2024. The Fund will continue investing in quality short-term Islamic money market instruments.

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

(d) Financial assets

Financial assets are recognised in the statement of financial position when, and only when, the Fund become a party to the contractual provisions of the financial instrument.

When financial assets are recognised initially, they are measured at fair value, plus, in the case of financial assets not at fair value through profit or loss ("FVTPL"), directly attributable transaction costs.

The Fund determines the classification of its financial assets at initial recognition.

(i) Financial assets at FVTPL

A financial asset is measured at fair value through profit or loss if:

- Its contractual terms do not give rise to cash flows on specified dates that are solely payments of principal and profit ("SPPP") on the principal amount outstanding; or
- It is not held within a business model whose objective is either to collect contractual cash flows or to both collect contractual cash flows and sell; or
- At initial recognition, it is irrevocably designated as measured At FVTPL when doing so eliminates or significantly reduces a measurement or recognition inconsistency that would otherwise arise from measuring asset or liabilities or recognising the gains and losses on them on different bases.

Subsequent to initial recognition, financial assets at FVTPL are measured at fair value. Changes in the fair value of those financial instruments are recorded in 'Net gain or loss on financial assets at fair value through profit or loss'. Profit earned and dividend revenue elements of such instruments are recorded separately in 'Profit income' and 'Dividend income', respectively. Exchange differences on financial assets at FVTPL are not recognised separately in profit or loss but are included in net gains or net losses on changes in fair value of financial assets at FVTPL.

(ii) Financial assets at amortised cost

Financial assets at amortised cost are those financial assets held within a business model whose objective is to hold financial assets in order to collect contractual cash flows and its contractual terms give rise on specified dates to cash flows that are SPPP on the principal amount outstanding. The Fund includes short term receivables and Islamic deposits with financial institutions in this classification.

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

(d) Financial assets (Cont'd.)

(ii) Financial assets at amortised cost (Cont'd.)

Subsequent to initial recognition, Islamic financial assets are measured at amortised cost using the effective profit rate method. Gains and losses are recognised in profit or loss when the financing and receivables are derecognised or impaired, and through the amortisation process.

(e) Impairment of financial assets

The Fund holds financial assets with no financing component and which have maturities of less than 12 months at amortised cost and, as such, has chosen to apply an approach similar to the simplified approach for Expected Credit Losses (“ECL”) under MFRS 9 to all its financial assets. Therefore, the Fund does not track changes in credit risk, but instead, recognises a loss allowance based on lifetime ECLs at each reporting date.

The Fund’s approach to ECLs reflects a probability-weighted outcome, the time value of money and reasonable and supportable information that is available without undue cost or effort at the reporting date about past events, current conditions and forecasts of future economic conditions.

(f) Classification of realised and unrealised gains and losses

Unrealised gains and losses comprise changes in the fair value of financial instruments for the period and from reversal of prior period’s unrealised gains and losses for financial instruments which were realised (i.e. sold, redeemed or matured) during the reporting period.

Realised gains and losses on disposals of financial instruments classified as part of FVTPL are calculated using weighted average method. They represent the difference between an instrument’s initial carrying amount and disposal proceeds.

(g) Financial liabilities

Financial liabilities are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability.

Financial liabilities, within the scope of MFRS 9, are recognised in the statement of financial position when, and only when, the Fund become a party to the contractual provisions of the financial instrument. Financial liabilities are classified as other financial liabilities.

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

(g) Financial liabilities (Cont'd.)

The Fund's financial liabilities which include other payables and sundry creditors are recognised initially at fair value plus directly attributable transaction costs and subsequently measured at amortised cost using the effective profit rate method.

A financial liability is derecognised when the obligation under the liability is extinguished. Gains and losses are recognised in profit or loss when the liabilities are derecognised, and through the amortisation process.

(h) Unit holders' capital

The unit holders' contributions to the Fund meet the definition of puttable instruments classified as Shariah-complaint equity instruments under the revised MFRS 132 Financial Instruments: Presentation.

(i) Dividend distribution

Dividend distributions are at the discretion of the Fund. A dividend distribution to the Fund's unit holders is accounted for as a deduction from realised reserves except where dividend is sourced out of distribution equalisation which is accounted for as a deduction from unit holders' capital. A proposed dividend is recognised as a liability in the period in which it is approved.

Distribution equalisation represents the average distributable amount included in the creation and cancellation prices of units. This amount is either refunded to unit holders by way of distribution and/or adjusted accordingly when units are cancelled.

(j) Cash and cash equivalents

For the purpose of the statement of cash flows, cash and cash equivalents consist of bank balances and Islamic deposits and Islamic placements with banks and other Islamic financial institutions with original maturity of three months or less, subject to insignificant risk of changes in value.

(k) Income

Income is recognised to the extent that it is probable that the economic benefits will flow to the Fund and the income can be reliably measured. Income is measured at the fair value of consideration received or receivable.

Profit income from Islamic deposits with financial institutions is recognised using the effective profit rate method.

2. MATERIAL ACCOUNTING POLICY INFORMATION (CONT'D.)

(l) Income tax

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the tax authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the reporting date.

Current taxes are recognised in profit or loss except to the extent that the tax relates to items recognised outside profit or loss, either in other comprehensive income or directly in equity.

No deferred tax is recognised as there are no material temporary differences.

(m) Segment reporting

Operating segments are reported in a manner consistent with the internal reporting used by the chief operating decision-maker. The operating results are regularly reviewed by the Investment Manager and the Oversight Committee. The Fund Manager assumes the role of chief operating decision maker, for performance assessment purposes and to make decisions about resources allocated to the segment.

(n) Significant accounting estimates and judgments

The preparation of the Fund's financial statements requires the Manager to make judgements, estimates and assumptions that affect the reported amounts of revenues, expenses, assets and liabilities, and the disclosure of contingent liabilities at the reporting date. Uncertainty about these assumptions and estimates could result in outcomes that could require a material adjustment to the carrying amount of the asset or liability in the future.

No major judgements have been made by the Manager in applying the Fund's accounting policies. There are no key assumptions concerning the future and other key sources of estimation uncertainty at the reporting date, that have a significant risk of causing a material adjustment to the carrying amounts of assets and liabilities within the next financial period.

3. MANAGER'S FEE

The Manager's fee is computed on a daily basis at 0.06% (15.05.2023: 0.06%) per annum of the NAV of the Fund before deducting the Manager's and Trustee's fees for that particular day.

4. TRUSTEE'S FEE

The Trustee's fee is computed on a daily basis at 0.02% (15.05.2023: 0.02%) per annum of the NAV of the Fund before deducting the Manager's and Trustee's fees for that particular day.

The TER of the Fund is the ratio of the sum of fees and expenses incurred by the Fund to the average NAV of the Fund calculated on daily basis. The fees and expenses included Manager’s fee, Trustee’s fee, auditor’s remuneration, tax agent’s fee and other administrative expenses. For the financial period ended 15 May 2024, the TER of the Fund stood at 0.04% (15.05.2023: 0.04%).

13. PORTFOLIO TURNOVER RATIO (“PTR”)

The PTR of the Fund is the ratio of the average acquisitions and disposal of the Fund for the six months to the average NAV of the Fund. For the financial period ended 15 May 2024, the PTR of the Fund stood at 10.68 times (15.05.2023: 14.04 times).

14. FINANCIAL INSTRUMENTS

(a) Classification of financial instruments

The Fund’s financial assets and financial liabilities are measured on an ongoing basis at amortised cost based on their respective classification. The significant accounting policies in Note 2 describe how the classes of financial instruments are measured, and how income and expenses are recognised:

- (a) all of the Fund’s financial assets, comprising Islamic deposits with financial institutions, cash at bank and profit receivable, are classified as financing and receivables which are measured at amortised cost; and
- (b) all of the Fund’s financial liabilities, comprising amount due to Manager and amount due to Trustee, are classified as other financial liabilities which are measured at amortised cost.

Total profit income recognised on the Fund’s financial assets is disclosed in the statement of comprehensive income. The Fund does not have any financial assets or financial liabilities which are carried at fair value.

(b) Financial instruments that are not carried at fair value and whose carrying amounts are reasonable approximations of fair value

The carrying amounts of the other financial assets and financial liabilities approximate the fair value due to their relatively short term maturity.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES

(a) Introduction

The Fund maintains investment portfolios in Islamic money market instruments as dictated by its Trust Deed and investment management strategy.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONT'D.)

(a) Introduction

The Fund maintains investment portfolios in Islamic money market instruments as dictated by its Trust Deed and investment management strategy.

The Fund is exposed to a variety of risks including profit rate risk, credit risk, and liquidity risk. Whilst these are the most important types of financial risks inherent in each type of financial instrument, the Manager and the Trustee would like to highlight that this list does not purport to constitute an exhaustive list of all the risks inherent in an investment in the Fund.

The Fund's objective in managing risk is the creation and protection of unit holders' value. Risk is inherent in the Fund's activities, but it is managed through a process of ongoing identification, measurement and monitoring of risks. Financial risk management is also carried out through sound internal control systems and adherence to the investment restrictions as stipulated in the Trust Deed, the Securities Commission's Guidelines on Unit Trust Funds and the Capital Markets and Services Act 2007.

(b) Risk management structure

The Fund's Manager is responsible for identifying and managing risks. The Board of Directors of the Manager is ultimately responsible for the overall risk management approach within the Fund.

(c) Risk measurement and reporting system

Monitoring and managing risks is primarily set up to be performed based on limits established by the Manager (and Investment Manager, if applicable) and Trustee. These limits reflect the investment strategy and market environment of the Fund as well as the level of the risk that Fund is willing to accept. In addition, the Fund monitors and measures the overall risk bearing capacity in relation to the aggregate risk exposure across all risks type and activities.

(d) Risk mitigation

The Fund has Islamic investment guidelines that set out its overall business strategies, its tolerance for risk and its general risk management philosophy. The Manager also has a Compliance Department to ensure that the Fund complies with the various regulations and guidelines as stipulated in its Trust Deed, the Securities Commission's Guidelines on Unit Trust Funds and the Capital Markets and Services Act 2007.

It is, and has been throughout the current and previous financial years, the Fund's policy that no derivatives shall be undertaken for either investment risk management purposes or for trading.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONT'D.)

(e) Profit rate risk

Profit rate risk is uncertainties resulting from fluctuations in the prevailing level of market profit rates on its Islamic investments and financial position.

As at reporting date, the Fund has no floating rate financial instruments and thus does not have significant exposure to profit rate risk.

(f) Credit risk

Credit concentration

Credit concentration risk is associated with the number of underlying investments or financial institutions which a Fund invests in or place deposits with. As the Fund is actively managed, investing at least 90% of its NAV in Islamic deposits, Islamic money market instruments and/or short-term Islamic debt instruments, all of which have a remaining maturity period of not more than 365 days, up to 10% of the fund NAV will be invested in Islamic short term debt instruments which have a remaining maturity period of more than 365 days but less than 732 days, such asset allocation allows for strategic switching of assets to protect the overall value of the Fund when necessary.

As at reporting date, the Fund placed Islamic deposits with a number of financial institutions. Thus, the Fund does not have significant exposure to credit concentration risk.

Credit default

This refers to the creditworthiness of the respective Islamic financial institutions which Islamic deposits are placed with and their ability to make timely payment of principal and profit. If the Islamic financial institutions become insolvent, the Fund may suffer capital losses with regards to the capital invested and profit foregone, causing the performance of the Fund to be adversely affected.

As at reporting date, the Fund placed Islamic deposits with reputable financial institutions.

(g) Liquidity Risk

Liquidity risk is defined as the risk that the Fund will encounter difficulty in meeting obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Exposure to liquidity risk arises because of the possibility that the Fund could be required to pay its liabilities or redeem its units earlier than expected. The Fund is exposed to cash redemptions of its units on a regular basis. Units sold to unit holders by the Manager are redeemable at the unit holder's option based on the Fund's net asset value per unit at the time of redemption calculated in accordance with the Fund's Trust Deed.

15. FINANCIAL RISK MANAGEMENT OBJECTIVES AND POLICIES (CONT'D.)

(g) Liquidity Risk (cont'd.)

It is the Fund's policy that the Manager monitors the Fund's liquidity position on a daily basis. The Fund also manages its obligation to redeem units when required to do so and its overall liquidity risk by requiring a 3-day notice period before redemptions.

The Manager's policy is to always maintain a prudent and sufficient level of liquid assets so as to meet normal operating requirements and expected redemption requests by unit holders. Liquid assets comprise cash, Islamic deposits with Islamic financial institutions and other Shariah-compliant instruments which are capable of being converted into cash within 7 days.

The following table summarises the maturity profile of the Fund's financial assets, financial liabilities and NAV attributable to unit holders in order to provide a complete view of the Fund's contractual commitments and liquidity.

The Fund's objectives for managing capital are:

- (a) To invest in Islamic investments meeting the description, risk exposure and expected return indicated in its prospectus;
- (b) To achieve consistent returns while safeguarding capital by using various Islamic investment strategies;
- (c) To maintain sufficient liquidity to meet the expenses of the Fund, and to meet redemption requests as they arise; and
- (d) To maintain sufficient fund size to make the operation of the Fund cost-efficient. To maintain sufficient fund size to make the operation of the Fund cost-efficient.

No changes were made to the capital management objectives, policies or processes during the current financial period.

17. SEGMENT INFORMATION

The Manager of the Fund is responsible for allocating resources available to the Fund in accordance with the overall Islamic investment strategies as set out in the Investment Guidelines of the Fund.

The Fund invests only in short term Islamic deposits and all of its investments are located in Malaysia, therefore disclosure by business and geographical segment is not presented.

18. CHANGES IN GROUP STRUCTURE
