KEY RISKS

Specific risks associated with this product:

Liquidity Risk	Liquidity risk refers to the ease of liquidating an investment depending on the investment's volume traded in the market. If the Fund holds short-term Sukuk that are illiquid, or are difficult to dispose of, the value of the Fund may be negatively affected when it has to sell such short-term Sukuk at an unfavourable price.
Profit Rate Risk	Profit rate risk refers to the impact of profit rate changes on the valuation of short-term Sukuk and/or Islamic money market instruments. When profit rates rise, short-term Sukuk and/or Islamic money market instruments prices generally decline and this may lower the market value of the Fund's investment in short-term Sukuk and/or Islamic money market instruments. The reverse may apply when profit rates fall. Meanwhile, short-term Sukuk and/or Islamic money market instruments with longer maturities and lower profit rates are more sensitive to profit rate changes.
	In addition, the Fund's placement in Islamic deposits will also be affected by profit rate changes. In the event of a decreasing profit rate environment, banks may offer Islamic deposits with lower profit rates, effectively reducing the potential returns of Islamic deposits. Profit rates offered by the Financial Institutions will fluctuate according to the overnight policy rate ("OPR") determined by Bank Negara Malaysia and this has direct correlation with the Fund's placement in Islamic deposits. The Fund will enjoy higher profit income when profit rates rise and vice versa. Upon the revision of the OPR, rates for pre-existing Islamic deposit placements will remain unchanged. The change in the OPR will only affect new placements made after such change.
	The above profit rate is a general indicator that will have an impact on the management of the Fund regardless whether it is an Islamic unit trust fund or otherwise. It does not in any way suggest that an Islamic unit trust fund will invest in conventional financial instruments.
Credit and Default Risk	Credit risk relates to the creditworthiness of the issuers of short-term Sukuk, Islamic money market instruments and/or the Financial Institutions where the Islamic deposits are placed and their expected ability to make timely payment of profit and/or principal. Any adverse situations faced by the issuer of the short-term Sukuk, Islamic money market instruments and/or the Financial Institutions where the Islamic deposits are placed may impact the value as well as liquidity of the short-term Sukuk, Islamic money market instruments and/or Islamic deposits. In the case of rated short-term Sukuk, Islamic money market instruments and Financial Institutions, this may lead to a credit downgrade.
	Default risk relates to the risk that an issuer of a short-term Sukuk, Islamic money market instrument or a Financial Institution where the Islamic deposits are placed either defaulting on payments or failing to make payments in a timely manner which will in turn adversely affect the value of the short-term Sukuk, Islamic money market instruments and Islamic deposits. This could adversely affect the NAV of the Fund.
Reinvestment Risk	This is a risk that future proceeds (profit and/or capital) are reinvested at a lower potential profit rate. Reinvestment risk is especially evident during periods of falling profit rates where the profit payments are reinvested at less than the yield to maturity (actual profit rate) at the time of purchase.
Regulatory Risk	Any changes in national policies and regulations may have an effect on the capital markets in which the Fund is investing. If this occurs there is a possibility that the value of Unit Holders' investments may be adversely affected.

Note: If your investments are made through a distributor (i.e. the institutional unit trusts advisers via a nominee system of ownership), you would not be deemed to be a Unit Holder under the deed and as a result, your rights as an investor may be limited if you are investing through a distributor. Accordingly, we will only recognize the distributor as a unit holder of the Fund and the said distributor shall be entitled to all the rights conferred to it under the deed.

The minimum Unit for redemption is 100 Units or such other lower number of Units as may be determined by the Manager from time to time. Investors shall be paid within three (3) Business Days from the date the request to repurchase is received by the Manager ("T Date"), subject to the cumulative redemption amount on T Date not exceeding 20% of the net asset of the Fund on T Date. Payment will be made within seven (7) Business Days from T Date if the cumulative redemption amount on T Date exceeds 20% of the net asset of the Fund on T Date.	
	For partial repurchase, the Unit holdings after the repurchase must not be less than 1,000 Units or such other lower number of Units as may be determined by the Manager from time to time. If the holdings of an investor are, after a repurchase request, below the minimum Unit holdings, a request for full redemption is deemed to have been made.	
	Other than the above conditions, there are no restrictions in terms of frequency and minimum Units to be repurchased.	
	Processing of a repurchase request shall be subject to the Manager's receipt of the complete application form and such other documents as may be required by the Manager.	
	Note: The Manager's distributors may set a lower minimum Unit for redemption or Unit holdings after the repurchase than the above for investments made via the distributors subject to their terms and conditions for investment.
